

## Contract Information

# Advanced Wound Care Delivery - Total Managed Service

Reference: SBS/17/OA/ELA/9101

## Potential saving opportunities 2%

### When does it start?

01/12/2017 to 01/12/2021

### Who can take advantage?

Any NHS or Public Sector organisation, core Members and Associate Members of SBS

### Aim of the procurement

To provide a legally compliant framework agreement giving members access to an efficient delivery of wound care and associated products in order to promote the immediate commencement of care and enhance the treatment pathway.

This off-script method allows users to order products online and hold a central point of stock rather than requiring patients to obtain products themselves via the traditional FP10 route, therefore increasing efficiency and reducing wastage.

The framework ensures that clinicians are still given the autonomy to make clinical and medical decisions.

### Why should I use it?

- **QUICK & COMPLIANT ROUTE TO MARKET**

A detailed procurement exercise has taken place to ensure that suppliers have met all legislative requirements. The framework contains provision for direct award and further competition, if required.

- **INCREASED FORMULARY & SPEND CONTROL**

This agreement will provide full access to live, real time data and can produce bespoke reports for the user enabling them to increase control of their spend and formulary.

- **ACCESS TO SUPPLIER EXPERTISE, TRAINING & EDUCATION**

This framework allows users to benefit from the know-how of the awarded providers in selecting the most economically valuable solutions to meet their commercial and patient requirements.

- **INCREASED EFFICIENCY & REDUCED WASTAGE**

Delivery is typically received between 24-72 hours after the point of order, resulting in improved stock availability and reduced lead times. The stock is owned by the organisation and not the patient so users can expect to see reduced levels of product wastage.
