

Shared Business Services

PS-Works: Public Sector Construction Works

NHS Shared Business Services

Shared vision. Better together

About NHS SBS

Established by the Department of Health and Social Care (DHSC) in a unique partnership with digital experts Sopra Steria, we deliver modern corporate services to the NHS, which improve efficiency and quality, save time and money, and support world-class patient care.

Today we provide a mix of Finance & Accounting (F&A), Procurement, Employment Services (ES) and Innovation & Technology Services (ITS) to organisations across the country. This includes 111 NHS providers and arm's length bodies, and every NHS commissioning organisation in England. It means that, in total, we deliver at least one corporate service to around two thirds of all NHS provider trusts and commissioners.

This size and scope means we are the leaders in our field, with unrivalled knowledge and experience that helps NHS organisations overcome many of the day-to-day challenges they face.

About PS-Works Framework Agreement

NHS Shared Business Services are a national provider of frameworks for the entirety of the UK Public Sector. NHS SBS aims to provide a compliant route to market for all client needs, delivering industry standard levels of procurement options.

The aim of this framework is to provide the NHS and wider Public Sector Clients with a compliant route to market for the provision of quality and value for money construction works projects from a mixture of Tier 1 and regional Contractors. The Framework provides pricing structures such as Overheads and Profits, design fees and rate cards for members of staff and is suitable for Design and Build, Build only and Refurbishment projects. We have designed our frameworks with flexibility in mind. This includes providing flexible choice of contact terms, wider regionalised supplier base, clear pricing structure and collaborative framework terms using the FAC-1.

Who can use the framework

All Public Sector Organisations across the UK including NHS, Local Authorities, Universities, Schools, Housing Associations, Police, Blue Lights, Central Government and all third sector organisations.

For full access to our Framework Agreement : <https://www.sbs.nhs.uk/proc-framework-agreements-support>

Framework Duration

17th December 2020 – 16th December 2023 with options to extend by two further two-year periods

Lot Structure

The framework has been broken down into the following Lots:

- Lot 1 - Public Sector and Healthcare: £0m – £2.5m (12 regions) – Maximum of 10 Contractors per region
- Lot 2 - Public Sector and Healthcare: £2.5m – £5m (12 regions) – Maximum of 10 Contractors per region
- Lot 3 - Public Sector: £5m - £15m (12 regions) – Maximum of 10 Contractors per region
- Lot 4 - Public Sector: £15m - £35m (national) – 8 Contractors
- Lot 5 - Public Sector: £35m+ (national) - 7 Contractors

In order to ensure a mixture of Tier 1 and Local Contractors, bidders were restricted to be awarded onto two neighbouring lots only. As such we are able to offer a compliant route to market with suitably sized Contractors for each value band. A list of each awarded contractor by lot and value band is seen below.

Scope of the framework

- All types of building & construction works – Including, but not limited to new builds, refurbishments and associated mechanical, electrical, civil engineering and services works.
- Related design and other services as part of a design and build or construction only project.
- Alteration and refurbishment as well as building maintenance including modifications to the buildings which may include electrics, plumbing and waste connections; this could include upgrading existing services and carrying out any maintenance work and repairs.
- Enabling works packages which includes demolition, remediation, asbestos and contaminant handling, and civil engineering works that are necessary to the building project itself.
- Contractors are able to provide additional services that include but are not limited to a feasibility study, planning application, full architectural design, enabling works, site works, landscaping, and soft landings as part of a full turnkey package.

Framework Principles

The Framework is established under 8 core objectives which the Contractors are required to embrace and commit to the realisation of:

1. **Social Value** - NHS SBS and Participating Authorities have a universal and strong social conscience and have embraced the implications of the Social Value. Contractor(s) are expected to align to the principles, obligations and aspirations set out in the Social Value

Act (2012) when delivering projects under the Framework Agreement, with regards to their behaviour and culture in respect of Corporate Social Responsibility.

2. **Modern Methods of Construction (MMC)** – Encouraging the use of modern methods of construction in line with government strategies. Contractor(s) are expected to embrace MMC in line with all current and future government strategies to ensure works are completed more cost effectively, while also maintaining build quality.
3. **Value for Money** - Provide demonstrable value for money for public sector Participating Authorities including delivering projects on budget, on time and with additional added value through social commitments - As a minimum, contractors are required to deliver projects on budget and on time. However, the Framework will evidence value for money beyond this to include social value and long-term operational cost benefits.
4. **Collaboration** - Collaborative partnership between Contractors, NHS SBS and Participating Authorities to continuously improve processes and maximise long term investment within the public sector - NHS SBS will maximise the impact of the collective group of contractors, ranging in size and location across the UK. Contractors will have a wealth of lessons learned to help improve local competition mechanisms and maximise early involvement in projects.
5. **Participating Authority Satisfaction** - Provide guaranteed high-quality Participating Authority satisfaction to all public sector organisations and become the framework of choice for healthcare and wider public sector projects - Participating Authority satisfaction is essential to retain and attract Participating Authorities to the Framework.
6. **Quality** - Maximise innovation and best practice within the industry to maintain a quality driven agenda through all project stages - It is critical that all Projects are delivered to the exact quality specification requirements set out by the Participating Authority to minimise operational impact.
7. **Procurement** - Improve procurement processes by early, open, and transparent supply chain engagement including robust and well-defined processes and fair payment terms - To maintain fair and sustainable treatment of the supply chain and maximise efficiencies and innovation.
8. **Integrated supply chain** – The possibility to utilise NHS SBS’s extensive range of complimentary frameworks to procure relevant goods and services. Including but not limited to Construction Consultancy Services, Hard and Soft FM, Modular Buildings and Car Park Management and Infrastructure. We have an established, off the shelf supply chain in place within our current portfolio of frameworks which may be used by Principal Contractors and/or participating Authorities.

Key Benefits for our Clients:

- **OJEU Compliant** - A detailed procurement exercise has taken place therefore no formal tendering is required, saving valuable time & money in the procurement process.
- **Mini Competitions** - Ability to tailor individual requirements via the use of further competitions.
- **Direct Award:** The Agreement allows all Participating Authorities to direct award if the conditions laid out in the Framework are met.
- **Clear Pricing Structure** - Clear regionalised pricing structure for Lots 1-3 and uniform national pricing structure for Lots 4 & 5.
- **Form of Call-off Contract** - The choice and flexibility to utilise a number of model form contracts such as JCT and NEC.
- **Collaborative** - The framework is built upon the FAC-1 Contract to ensure collaboration throughout.
- **Local and National Contractors** - The agreement allows for access to large national Contractors, but also a healthy number of regional SMEs to suit all types of construction projects.
- **Government Strategy and Modern Methods of Construction (MMC)** - Support government strategy by ensuring that social value, sustainability and MMC are incorporated within the Agreement to ensure best value is delivered.
- **Construction Playbook** – Although this framework predates the Playbook, a number of the key themes we have introduced chime with the government’s stated aims.

Forms of Contract

The framework is built upon the FAC-1 Contract to ensure collaboration throughout. The Framework Alliance Contract or FAC integrates alliance members under a single multi-party contract with:

- agreed objectives, success measures, targets and incentives linked to improved value.
- agreed alliance activities including supply chain collaboration.
- joint risk management, collaborative core group governance and non-adversarial dispute resolution.
- creation of project contracts and Direct Award and/or Competitive Award procedures
- engagement with stakeholders and option of Additional Alliance Members.

The Project Contract Conditions used by the Participating Authority or an Additional Client for a Project Contract awarded to a Contractor will be one or more of the following standard forms of building contract or the Additional Client’s modified version of such standard forms:

- JCT
- NEC3
- NEC 4
- ACA PPC 2000
- Constructing Excellence Contract
- IPI (Integrated Project Insurance) Collaborative Contract
- NHS standard terms and conditions
- Any other suitable alternative form of contract as agreed between the Additional Client and Alliance Member

PS-Works Process Map

Download Buying Guide

You are able to register your authority to utilise the framework with no cost or obligation at the following link
sbs.levelcloud.global/data-service/aipius#/login

Once registered download the latest copy of the buying guide which will contain full guidance including the list of awarded contractors by lot and region, the contractors ceiling rates and contact details

Pipeline

Sharing pipelines allow contractors to prepare and manage their supply chain and allocate resources to bidding for projects. Customers benefit from bids with resources allocated and fewer chances of delays or supply chain issues. Sharing pipelines allows for a more harmonious and collaborative approach between customers and suppliers and allows for resilience in forecasting. Early engagement allows for more certainty which provides incentive for investment in people, innovation and financial health of suppliers. Please complete the access agreement and send to nsbs.construction@nhs.net so we will can all relevant bidders aware of the opportunity

Capability Assessment

This can be used to gauge interest in a project with a view to a direct award or as part of the mini comp process. For the latter please send out the Capability Assessment to all Contractors on the relevant Lot/Region providing Details on the authority, Procurement route, name of tendering portal to be used, timelines, estimated construction value, form of contract to be used. Mini Comp documents to only be sent to those that OPT IN. Please provide sufficient time for the bidders to respond.

Direct Award
1-2 Week

Two Stage Mini Comp
6-10 Weeks

Single Stage Mini Comp
4-6 Weeks

Please note the weightings can range from 50-100% for quality and 0-50% for price always totalling 100%

Request for Quote

Make contact with the preferred contractor providing details on the scope of service, timescales and form of call off contract to be used. You are able to utilise the suggested conditions for direct award listed within the buying guide. If the quote is accepted move onto the next stage.

Stage One

Develop tender documents including as much information as possible with well-defined requirements (as subsequent changes could prove expensive). Examples include but are not limited to:

- The pre-construction and/or construction programme
- The design of the project
- Developing the method of construction
- A request for Method statements
- Preliminaries and/or staff costs
- Overheads and profits
- Schedule of rates to be applied to the second stage tender.
- Fees for design (if applicable) and/or any other pre-construction services.
- CVs for key members of staff.
- The contract to be applied to the second stage.

Single Stage

Formulate Evaluation criteria and define weightings. NHS SBS can provide template mini comp documents on request.

Evaluation

Evaluate the bidders as per the criteria set out in the tender documentation

Service level Agreement (Order Form)

Upon completion, please complete the template Service Level Agreement (order form) document jointly with the awarded contractor, return a copy to nsbs.construction@nhs.net once counter signed and ensure the framework reference SBS/18/DT/PZC/9332 is clearly stated

PROCESS COMPLETE

Stage Two

Upon Award, enter into a pre-construction agreement. The contractor will then finalise design, source Sub Contractors and the Supply chain. Should the Participating Authority not agree to the 2nd stage the first stage fee would be the full and final settlement of the contractor's costs

PROCESS COMPLETE

Service level Agreement (SLA)

Should the Participating Authority agree then the works can begin. Again please complete the template SLA document jointly with the awarded contractor, return a copy to nsbs.construction@nhs.net once counter signed and ensure the framework reference SBS/18/DT/PZC/9332 is clearly stated on any PO

PROCESS COMPLETE

Construction Consultancy Services

The PS-Works: Public Sector Construction Works framework allows for a direct design & build option however the participating authority may want to consider utilising the Construction Consultancy Services framework for design at the beginning of their journey, the use of a project manager to undertake the duties, using professional services to administer and run the tender/ procurement, the use of an independent Quantity Surveyor with many other ancillary services offered.

Modular Buildings

The Modular Buildings Framework provides a compliant route to access modern methods of construction. This framework agreement includes the purchase, hire or lease of modular solutions, including; offsite building solutions, modular hospital buildings, patient offload departments (PODs) and education solutions. The framework for modular buildings provides bespoke solutions for your needs; from office space to student accommodation, and from care homes to homeless shelters. This framework is open to the NHS, local authorities, schools, academies, 6th form colleges, universities, Central Government, and other public sector organisations.

Car Park Management & Infrastructure (CPMI)

Provides Estate, Facilities and Capital teams a compliant route to market for the provision of Car Parking Services from a wide range of specialisms, utilising both SME and national providers, to

deliver either a single service, bundled service or provide a one-stop shop for a wide range of services

Soft FM, Asset Compliance and Security Services

Provides a compliant route to market for soft facilities management services across a range of disciplines including; Pest Control, Security Services, Asbestos Management, Demolition and Removal, Cleaning, Laundry, Catering, Lift Maintenance and many more.

Hard Facilities Management

Provides a compliant route to market for hard facilities management services across a range of disciplines including; BMS, CAFM, Plumbing, Catering, Air Conditioning, Fixed Wire Testing, Boilers, Fire & Electrical Equipment, Measured Term Contracts, Removals and includes a full Managed Service Provision.

Design Furniture and Appliances

Provides a complaint route to market for Design Fit Out Ward Furniture, Curtains, Catering Equipment, Ventilation Systems and maintenance, White Goods, Bariatric Furniture, Vending Machines, Water Coolers and many more.
